ASF Hospital

Monthly Report

July to November 15, 2020

ASF provided all our services with maintaining safe distance. From October 2019 we are open for providing health care support to the survivors and other facilties. Medical Hotline service is continuing process for them .Even in this Covid-19 Situation it performed as a blessings. We received 124 calls from July, 2020 to November 15,2020 from all over the Bangladesh regarding acid victim's medical consultation. All calls are including health consultation, new case management in govt. hospital, about referral to tertiary hospital, legal advice, financial request for food and medicine.

There is a summary given below about the beneficiaries' statistics.

Medical Advice

Acid victims are asking for health consultation which are their regular complications occurred due to chemical burn. Most of the issues are regarding contracture, eye problems, hearing problem, infection, feeding tube management and many more. We tried to solve this problem through hotline, direct service, nearby available govt hospital and with the help of our specialized consultation panel.

Revised and Modified Activities of Medical Unit

Consultation and follow up through hotline service.

Remote case consultation and treatment made available from nearby govt. hospital.

New case management and keep monitor on them with govt doctors of respected hospital.

Assistance in referral of critical cases to specialized hospital and took advice from our professional specialized consultant panel.

Bearing ambulance cost and medicine cost after assessing their financial status.

Financial assistance for buying medicine

Financial support for emergency foods and medicine.

Activity Summary

Remote Consultation

One one our survivors received 5500 BDT for her blood transfusion Though she needs more to complete her whole treatment procedures.

Referred to Govt Hospital:

One of our adopted patient, age 26 years old was referred to NIDCH on 25th October, 2020 Under Thoracic Surgery Unit,who is on Intravenous fluid,has a history of dilatation of 5 times. Cv line is done on 3rd Novemver . Jejunestomy tube is changed 5th Nov. Patient was advised to do contrast X-ray of abdomen.

Now medicine can be injected through the tube.

Financial Assistance for emergency surgery medicine and foods

We are providing emergency medicines and food with the help of UK Charity Fund. For this project we listed 51 acid victims who are in need during this crucial moment of COVID-19.We have already disbursed 3,34,500 BDT to 51 acid victims from this project.

7 patients got their prescribed medicines from medicine store of Medical Unit.

Another patient, 6 years old when she became a victim of Acid attack (Chemical burn) with her mother. ASF hospital adopted both of them as their patient. Since then ASF is helping them. The patient has congenital heart disease which was an incidental finding during a follow up treatment, When her mother passed away, she was handed over to "Handicapped Children Home' at Rajshahi As her father was the perpetrator and she has no other legal guardians.

She is 24 years old now. Nowadays her condition is deteriorated due to her heart disease. After follow up Professor has been decided to perform surgical intervention named Open heart surgery. Though it was risky but it is beneficial for her health In this regards we provided 1 lakh taka for the surgery. Finally completed the surgery successfully on 12th November 2020.

Thanks,

Hridita Mustafiz
