

**Research,** publication and dissemination of information on issues of environment and development.

**Networking** with other organisations to disseminate information, mobilise and sensitise the public about environmental conservation issues.

*An environmental awareness class in progress*

#### **Challenges:**

These include; Funding, no means of transport  
And the enormous demand for ECE Services

*Seedlings on arrival at one of the beneficiary schools*

#### **Appeal:**

We appeal to the general public to join us in our effort to conserve the environment. You can participate by donating funds for our activities; or tree seeds to be propagated, funding the mobilization and sensitization campaigns, donating land to plant trees, and inviting ECE to facilitate any environmental related activities they prepare. If you would like to engage in any of the activities above, please contact us on our address on the front of this brochure.

### About Us:

ECE is a community based organization and it got registered in 2008 with the Directorate of Gender and Community Services.

ECE is a non-sectarian, non-religious and non political organization because it concerns every living person to be and live in a healthy environment.

### Our Mission

Strengthening the capacity of communities to utilize the natural resources to achieve sustainable socio-economic and environmental benefits.

### Our Vision

A healthy environment where communities use and manage natural resources in a sustainable and equitable manner.

### Our Objectives:

- To promote and enhance community awareness and participation in environmental conservation activities.
- To improve on people's capacity to address environmental conservation and development issues in the communities.
- To facilitate the initiation of sustainable, environmentally friendly income generating activities to better people's livelihood.
- To carry out research, publication and dissemination of information on environmental and developmental issues.

### Our motto.

Working for a sustainable earth.

### Values

ECE believes that a healthy environment is the basis for our economic and social well-being. Thus endorses the "Precautionary" and "Polluter pays" principles.

### Achieving our goals:

**Education:** building awareness around key issues, alternatives and specific actions to solve environmental problems

**Cooperation:** outreach to individuals, educators, governments and other groups around the world to share information, learn from them and collaboratively undertake joint action.

**Tree planting:** planting of native species to conserve the environment

**Income Generating Activities:** that are socially, economically and environmentally friendly.
