Akua: How do you expect us to compete with other school children writing ICT examinations, when our school does not have computers and we have not touched the keys of a computer?

Akua is a Basic School pupil of Adzokoe in Ghana's Volta Region. She has the dream and ambition of becoming a doctor who will serve in rural communities. But she does not know how to become one.

Think about this – what is YOUR dream for: Akua? Her family? Adzokoe community? The youth In Adzokoe? Support them?
