Life-Changing Heart Surgeries

**Change lives,
change the world**

MEDRIX Child Heart Surgeries Save Lives

*In partnership with Huê Central Hospital,
Huê, Vietnam*

Children's heart disease is the most common birth defect globally and **90%** of the children born in developing countries have no access to the care they need. With labored breathing and lack of energy, these children are not able to attend school or run around and play like other children.

MEDRIX sponsors life-saving heart surgery for disadvantaged children who desperately need it and can't afford it. With the help of our donors and partners in Vietnam, we have successfully sponsored 59 heart surgeries to improve the lives of children in Vietnam.

MEDRIX Goals:

- * Identifying Real Needs
- * Discovering Real Solutions
- * Sharing Resources
- * Exchanging Knowledge
- * Project Sustainability
- * Offering Hope

How the program works

- * Each surgery costs between \$800 and \$2,400, with an average cost between \$1,000 and \$1,200.
- * Children and their families are selected by our partners in Vietnam.
 - * The families are interviewed to determine needs.
 - * The children are admitted to Huê Central Hospital where the surgeries take place.
- * Once the surgeries are completed, follow-up continues to ensure healthy recovery.

Donate to support our life-changing programs in Vietnam!
