In good time we began the year of the coexistence project between the two schools – A-Sallam of Majd el-Krum and Dekel of Karmiel, both in the upper-Galilee.

On Wednesday, 20 November, we held a planning meeting of the leading teams from the two schools, and planned the encounters during the current school year.

On Sunday, 24 November, we met with all educators of the two schools. We updated them with the plan for the school year and publicly declared the commencement of the project activity for the year.

We spoke about our expectations from the project this year. We also discussed the discourse we should lead with the students and their parents in order to attract them to the significance of the educational and cultural issue for our daily lives as citizens in a multi-cultural country.
