

Çağdaş Türkiye'nin
Gelecek Güvencesi

Young Starfish Project

Aims

- ❖ Reducing inequality in education
- ❖ Enabling students to know and have 21st century skills

Scope and Operation

- ❖ Target group: disadvantaged high-school students (mostly girls) whom we support through scholarships, coming from all over the country
- ❖ How? On Zoom, up to 60 participants per class, approximately 15 classes

Methodology

- ❖ Based on experiential learning
- ❖ Digital tools such as Mentimeter, Zoom Whiteboard, Breakout Rooms, Padlet etc.

Afterwards

- Once workshops and seminars are completed, we'll give them some related topics where they can work as team and ask them to develop a Project which includes detailed research and presentation
- i.e. Discussion about new media; the source of information has multiplied has positive connotations but there is information pollution.
- i.e. Turkey's history in terms of challenging gender inequality compared to Europe
- i.e The concept of smart-city; how can a be city smart?
- i.e Sustainability in fashion industry? Recycling? Consumerism?

Gelecek Güvencesi*

Afterwards

- **Social Impact Analysis:** ÇYDD Centre Office hired a particular personnel for monitoring and evaluation
- Analysis will be based on surveys that aim to measure learning outcomes
- Focus group interviews will be done
- Feedbacks from both expert trainers and branches will be collected via Google Forms
- The report will be published in Turkish. However, a summary will be published in English.

Budgeting

- Bilim Virüsü and Makers Türkiye are our two main partners who provide us expert trainers in particular subjects. They are paid accordingly.
- Zoom expenses; we have 4 four licensed accounts; each week evening, 3 classes; and another reserved for organization's and Project's other workload
- We provide internet support to those who are in need
- We provide computers to those who are in need (our organisation provide most of them)
