

Leh Flood Response

Oxfam India

Humanitarian Programme

INDIA

AUGUST 2010

Some facts from the disaster area

- More than 20,000 men, women and children affected
- 178 lives lost and more than 700 still missing
- Thousands living without safe water, proper shelter and hygienic sanitation
- Oxfam India is reaching out to 2000 households in 10 villages affected by floods

Emerging Needs

- Safe Water in camps
- Sanitation needs
- Winterized Shelters
- Irrigation Canal Repair (Livelihood)
- Sand casting of agricultural land

Programme Goal

- To ensure that the worst affected households have immediate transitional shelter support to safeguard themselves against the incoming winter and access to safe water and sanitation facilities to minimise public health risks and reduce avoidable mortality in Leh district.

Oxfam India Programme

The programme activities are:

- Shelter package for winter: Oxfam would provide winter shelter NFI kit to the 1000 worst affected households. The support would include Shelter NFI which the households can use while in their transitional shelter.
- Safe Water provision: Oxfam India's WASH programme would cover 2000 households who have both been directly and indirectly affected by the disaster. This would mean immediate provision of safe water in the camp areas and affected villages.

Outcomes

- **OUTCOME 1**

- 2000 targeted households in the affected areas will benefit from hygiene-related NFI distributions before the end of the project period

- **OUTCOME 2**

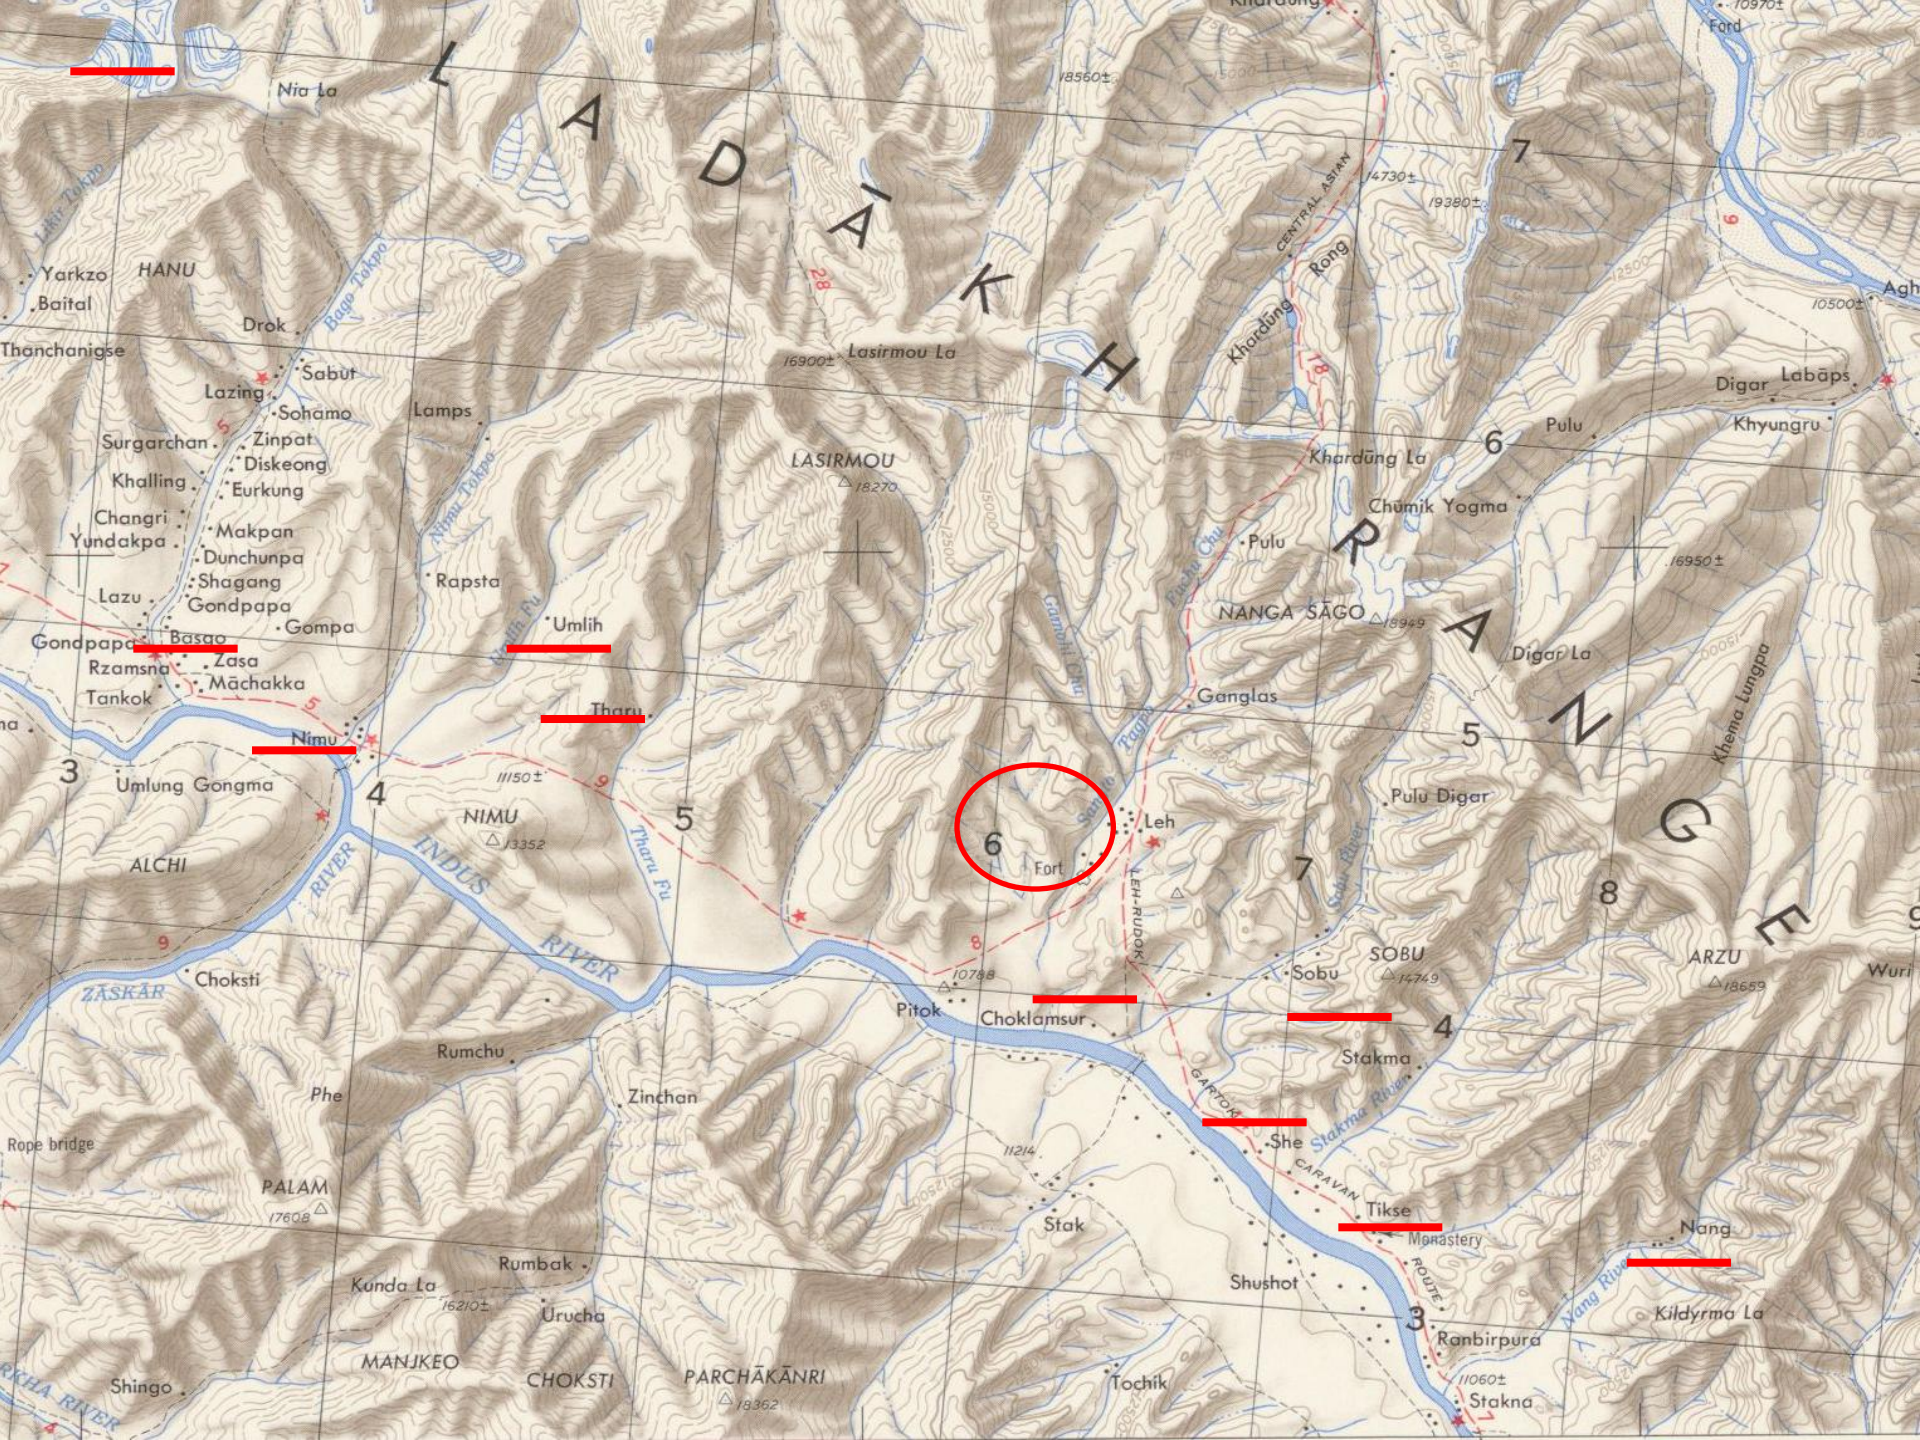

- 2000 targeted households in villages and camps have access to clean drinking water

- **OUTCOME 3**

- 2000 targeted households in the affected areas (especially camps) have increased access to and make optimal use of sanitation facilities & take action to protect themselves against public health risks before the end of the project period.

- **OUTCOME 4**

- 1000 targeted households (who have lost their homes and assets) in the affected areas have increased access to basic NFI and make optimal use of it & take action to protect themselves against the winter before the end of the project period.

T -11 being erected in Solar camp

T-11 ready to use at Solar camp for 220 households
