

20\$ enhances EMTCT and a health child raised.

When SORAK carried out a psychosocial visit to Olivia a teen widow living with HIV/AIDS, little did we know that a support of seed grant of 20\$ got from global giving supporters would mean a lot to the life of this single mother.

Olivia used the money to buy startup items for her snack making business. The startup items included, a charcoal stove,1 kilogram of wheat flour, a liter of cooking oil, baking powder and a table.

She was by then isolated and full of stigma ,after SORAK social workers numerous visits and encouragement, Olivia has escaped from stigma, she got a new husband equally living with HI/AIDS with whom they have been able to produce an HIV/AIDS free boy.

“ from the capital you provided me, we have been progressing on well, I have been able to visit the hospital for my ‘tablets’(meaning ARVs),I was advised on how to have an AIDS free baby despite myself and my husband being HIV+,all this has been made possible because of your support” ,asserted Olivia.

Many more widow teen mothers can have their livelihood and health improved with a few more dollars contributed by our dear friends from global giving.

Great thanks for those who have donated and those planning to support us.
