

## **Widows now venture into Lemon grass growing for essential oils production and sales**

SORAK is pleased to report to her global giving donors that the support provided since 2010 has helped to prepare widows into organized and productive groups.

These groups have had the opportunity to get support from the recently introduced project of lemon grass growing. The Common Wealth of Australia has provided SORAK and vulnerable groups to grow lemon grass and distil essential oils from this unique crop.

In addition to goats, chicken and piglets, widows will now have the opportunity to sell lemon grass on a sustainable basis with a lot of environmental benefits.

*In the photos above: The lemon grass planting material distribution function; a total of 57 widows and a few selected men (PHAs) were provided with 14 tones of lemon grass seedlings (tuft)*
