

In Nepal, until a few weeks ago,

children had homes to live in...

a school

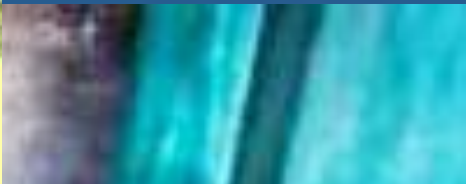

a classroom to sit in...

But after the two devastating earthquakes in April and May, the country looks like this...

The classrooms are destroyed

**The schools are in ruins and
the parents distraught.**

**Windows hang without walls
to support them.**

cracked and unsafe classroom walls...

locked girls' toilet, unusable...

**Now, children play in the ruins
of their school.**

And classes take place in the open.

Nepal cries out for help!

Appeal for Your Support

I am hopeful that your support will help to continue children's education, who are the victims of the disaster. Your small support will make a big change in children's life.

Thank you !

Pushker Kadel

Director, Language Development Centre Nepal
