

A great deal of progress has been recorded since the initiation and effectuation of this project. Arthritis Care Foundation (ACF) has been providing people with the facilities and care they need by effectively diagnosing their disease and hence avoiding actions based on ignorance and reducing fatality rate.

In the picture, Uzma, 26 years old is suffering from Rheumatoid Arthritis. She is a mother of a lovely daughter. ACF has been supporting her medication for the past 6 years, giving her hope and helping her to cherish time spent with her loved ones.

ACF would like to genuinely thank all the supporters who have helped and joined hands for such a noble cause. We sincerely show our gratitude to all our supporters for giving lives to people, making their dreams come true by supporting them to recover from their ailments. There are many others like Uzma who need your help. Together we can bring their smiles back!
