

FUNDACION VIVATMA

BE PART OF THE PROJECT

*“It always seems
impossible, until it is
done”*

-Nelson Mandela

We have been working hard for 12 years to protect the animals that are abandoned, in order to create a culture of love and respect towards them.

We have managed to rescue more than 300 dogs during all these years and through out this time we have been thinking about expanding our community to continue helping.

A HOUSE FOR KIDS AND CATS

A space created to rescue cats. With this proposal we want to solve a big problem, which is the overpopulation of stray and feral cats.

*Every homeless animal is an
opportunity to change the
world.*

A SAFE AND LOVING SPACE.

Children with special needs as autism or cerebral palsy often live on the fringe of society, isolated from a natural environment which includes being with animals

Part of the project includes helping children with special needs to interact with the cats since according to studies this has healing effects on both parts.

OUR GOAL...

With a proper shelter we could give at least 30 rescued cats the chance to recover within a safe place from physical or emotional traumas, and become therapy cats for kids with special needs until they are adopted into forever homes.
