iMobile Lab

The Blended Classroom Project

In 2012, Agastya International Foundation joined hands with Dell Global Giving's Youth Connect to launch the iMobile lab in Noida and Coimbatore.

Serving over 600 children from government schools, the lab is sparking curiosity and creativity by creating opportunities for experiential, hands-on learning.

Engaging sessions full of hands-on models, teacher participation and peer-to-peer interaction draw learners into the world of science.

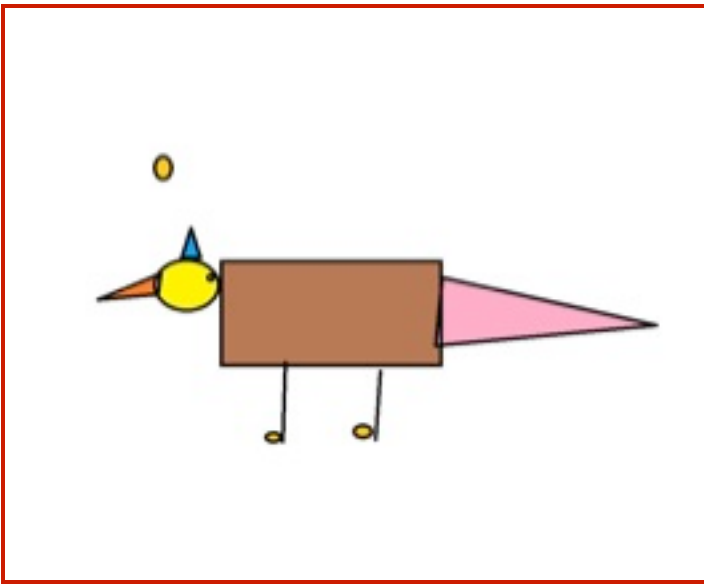

Mini computer projects are a chance for learners to creatively use what they've just learnt, while improving their computer skills.

These blended classrooms, which balance traditional, non-traditional, and digital approaches to learning provide a vibrant environment to spark curiosity...

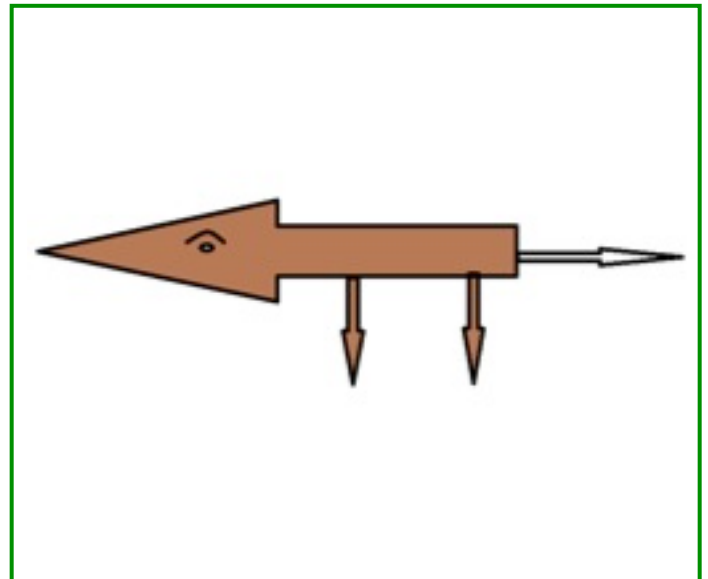

The iMobile Lab works with children who have little or no prior experience with computers.

Let us take a peek into some of their mini-projects...

And discover through their eyes how exciting learning can be...

Shapes
are fun!

After learning about a variety of different shapes, learners let their imagination run wild by drawing their favourite animal using simple shapes in *M.S Paint*.

Your own story!

Learners improve their *Powerpoint* skills by shuffling slides to narrate their own version of a wordless story.

Shadow Play!

After learning about light and shadows, learners draw imaginary suns around objects and draw their shadows using *M.S Paint*.

With new knowledge, come new words and concepts. Word Searches are a fun way to master new vocabulary and learn *M.S Word*.

Cost-effective and scalable, the iMobile Lab represents a continuous effort by Agastya International Foundation to

Make Learning

Fun! Useful! and Accessible!

THANK YOU!
