

Community Pre-Schools Project in Buea, Cameroon

Why Provide Pre-Schools Education

Pre-school education is not a privilege that is granted by the society to its young children, but a duty that the society fulfils towards its children. Evidence shows that childhood education can result in substantial future gains including increased in school achievement and cognitive development. It is therefore a necessary component of all national and regional development programs. Pre-school project addresses children's needs in the context of their communities' aspirations and resources.

We are trying to help mothers and families improve their children cognitive development, health, culture and nutritional status in two pilot areas – Bonakanda and Bonduma villages.

1. Bonduma Community Pre-school Project.

Project Total Budget- 20 000 USA \$

To complete construction work on the main building, equip and furnish the hall, rebuild the toilet and fence the surrounding to host the Bonduma Community Pre-School.

Target Opening of school- September 2013.

2. Bonakanda Community Pre-school Project Budget.
