To My Donor/
Supporter

Dear Madam/Sir,

It is with joy and happiness for me to address this letter to you to thank you for your support during this internship. I was working with an organisation call Proclimote international which is actually an NGO in Buea, Cameroon. This organisation is one to prevent global warming. In order to achieve this goal, the organisation distribute stoves to women in towns of Cameroon cut lower prices. The stove uses lesser quantity of fuel wood as compared to the three stone fire site which uses alot of wood and encourages deforestation. This stove also protects our environment from pollution, it doesn't produce alot of smoke and also protects our health. In addition, this organisation organise tours and carry tourist to the mountain.

My job in this organisation was to create a website and also a face book account to help advertise their products. Since the organisation already had a website, it was easier for me to take information from there and fit in the new website. What was difficult for me was to summarise the information in their old website because the information given to me was bulky and discourages some one from reading it. Occasionally, I usually follow the members of the organisation to the market to sell the stoves to women and I also teach the women how to use the stoves and tell them the advantages of the stoves. This was my favourite part.

When I finished with the website creation and face book account, the executive director of the organisation Mr Jean Claude had a view of it and he was so amaze and happy because I did more than what he expected. This really made me happy and proud and I give all thanks to YAN because that is where I got the skills I am now proud off and also without YAN I could not have had the opportunity to do what I was asked to do for the organisation.

I how ever wish I could have been given the opportunity to create a video for the organisation especially to show a full demonstration of how the stove functions.

Thanks for your support
~~Lucia~~
