

Medical report

Name: Paola

Age: 16 years old

Paola has major burn injuries and has needed multiple surgeries, last years on the face, eyes and ear.

She was worried because she lost one of the eyebrows, so she underwent reconstructive surgery. The surgeon removed a strip of scalp from behind the ear and used it to redesign the eyebrow.

The multiple surgeries have significantly improved Paola's facial aesthetics, improving her self esteem and social integration. She is also receiving nutrition care and therapeutic makeup lessons.

Paola is in junior year and is a good student.
