

May 2022

Hi, my name is Greet.

I'm 9 years old and come from Venezuela. I live with my family in Coquimbo, Chile since 2017.

In May 2021, there was a fire at home while we were sleeping. I was severely burned and needed hospitalization. I underwent graft surgeries and unfortunately, the doctors had to amputate my right hand's little finger .

I came to COANIQUEM for rehabilitation treatment. We were told that this is the best place to recover from burns and it is true. I do not have to pay anything and there is a team of doctors, psychologists and therapists taking care of me. There is also a residence to stay at and a hospital school to continue studying while I am in treatment.

I wear compression garments and orthotics to prevent the contraction of my hands due to the scars.

Thank you for supporting my treatment in COANIQUEM

Scarred tissue does not grow like healthy skin, which prevents burned children from growing normally.

Your financial support allows a burned victim receive a free and comprehensive rehabilitation treatment in COANIQUEM, including all the surgeries and therapies needed until the child stops growing.

Your support helps a Latin American burned child to lead a healthy and fulfilling life.
