

COANIQUEM BCF

Transforming lives after burns

FUTURE IMPACT METRICS

We are prepared to collect and report the following metrics:

- **Number of Children Treated:** Every child treated represents a life transformed.
- **Number of Healthcare Professionals Trained:** Each professional we train amplifies our impact, extending expert care across Latin America.
- **Number of Data Entries in the Burn Registry:** Each entry informs public policy, turning every burn injury into a step towards prevention.

PROBLEM

Every 5 seconds, a burn injury occurs that requires medical treatment. In the US, 486,000 cases are treated annually. However, due to limited access to quality burn care and rehabilitation, the number of cases in Latin America is believed to be in the millions. Without intervention, these children face physical and emotional suffering, with lasting impacts on their quality of life and role in society.

SOLUTION

We heal burn victims holistically, from physical wounds to emotional scars. Our programs aim to reduce the physical, emotional, and societal impacts of burn injuries. We sponsor children's treatment, train local burn professionals, and collect data to inform public policy. By doing this we transform burn injuries at personal, local, and regional levels.

FUNDING NEEDED

Your contribution can lead the journey of transformation for burn victims:

- **\$4,000** provides 1 child burn victim with comprehensive treatment for a year, giving them a chance to heal and thrive.
- **\$5,000** equips 1 local health professional with the necessary training, enhancing our capacity to help more children.
- **\$80,000** sustains the annual operation of the RELAQ Burn Registry, driving data-driven decisions that impact public policy.

Your contributions directly fund our treatment, training, and data collection programs.

WHY US

COANIQUEM has been serving vulnerable children with burns for 45 years, having treated over 145,000 children, trained 600 burn-care professionals and collaborated with over 20 countries in Latin America to amplify its impact. Looking forward, we aim to become a catalyst for change in burn care and prevention.

COANIQUEM BCF

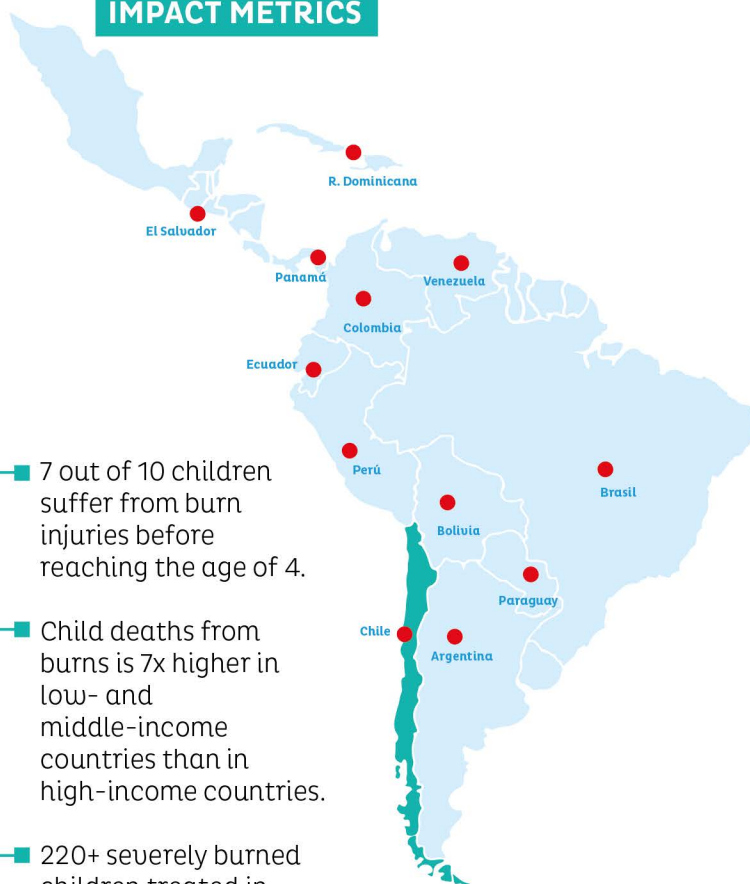

Transforming lives after burns

"My recovery journey has been long and grueling, but I'm happy because it's all been worth it. For the past 18 years COANIQUEM has been my family; it's a lovely organization where everyone welcomes you with open arms. I'll be forever grateful to COANIQUEM, and I will always hold it in my heart."

LIDIA · PERÚ

IMPACT METRICS

- 7 out of 10 children suffer from burn injuries before reaching the age of 4.
- Child deaths from burns is 7x higher in low- and middle-income countries than in high-income countries.
- 220+ severely burned children treated in Latin America.

PROBLEM

Every 5 seconds, a burn injury occurs that requires medical treatment. In the US, 486,000 cases are treated annually. However, due to limited access to quality burn care and rehabilitation, the number of cases in Latin America is believed to be in the millions. Without intervention, these children face physical and emotional suffering, with lasting impacts on their quality of life and role in society.

SOLUTION

We bring healing to burn victims holistically, from physical wounds to emotional scars at our Burn Care Centers in Chile. Our **Sponsor a Child program** aims to alleviate the suffering of these children by supporting the comprehensive, evidence-based rehabilitation in Chile. We ensure access to quality medical treatment, psychological support, and specialized rehabilitation services. Our goal is to help every child achieve full reintegration into society.

FUNDING NEEDED

The total cost to sponsor one child for a year is US\$ 5,000, considering clinical wages, travel and lodging within Latin America, medical supplies, utilities, and general expenses. **We aim at treating 50** severely burned children from Latin America every year. We only need your help to make this possible.

WHY US

With 45 years of experience, COANIQUEM in Chile has treated over 145,000 children with burns. The multidisciplinary team, evidence-based practices, and commitment to transparency set it apart. COANIQUEM BCF is a registered 501(c)(3) organization in the US.
