

**DIVINE TOUCHING LIFE FOUNDATION STATISTICS FROM THE COMMUNITY OF DORONGO AKOBULIKOBISI IN THE UPPER EAST REGION OF GHANA.**

Dorongo, Akobulikobisi community is one of the communities in the Bolgatanga Municipality of the Upper East Region, Ghana. It is 6km away from Bolgatanga, the capital town of the Region.

It has a population of about one thousand, six hundred people;

Women	-	650
Children	-	680
Men	-	270

This community is lacking clean portable drinking water and have walk a long distance as far as (13km) away to search for water for drinking and for house whole choices.

This unhygienic water consumed by the people has caused them to be prone to disease and sicknesses like diarrhea, guinea worm, typhoid and other waterborne diseases.

School children in the community face a lot of challenges in their studies due to lateness to school as they have walk a long distance each for water. Both the villagers and their animals drink from the same source of water found below.

**DIVINE TOUCHING LIFE FOUNDATION STATISTICS FROM THE COMMUNITY  
OF ZURIBISI AGUMDOO IN THE UPPER EAST REGION OF GHANA.**

Zuribisi Agumdoo is one of the communities also in the **Bolgatanga** Municipality of the Upper East Region, Ghana. It is 16km away from Bolgatanga, the capital town of the Upper East Region of Ghana.

It has a population of about two thousand, three hundred (2300) people;

Women	-	751
Children	-	949
Men	-	600

This community is also lacking portable drinking water and due to this both children and their parents have to walk a long distance as far as (10km) away to search for water for drinking.

This unhygienic water consumed by the people has caused them to be prone to disease and sicknesses like diarrhea, guinea worm, typhoid and other waterborne diseases.

The inhabitants of this community are mainly farmers, and do not have any better source of income.

**NB:** It was realized that the number of children in this village exceeds the number of both men and women because of lack of proper family planning.
