

SUPPORT K.I.D.S. AGAINST SIDS ON GLOBAL GIVING.COM MARCH 13!

Sudden Infant Death Syndrome (SIDS) remains the leading cause of death among infants aged one year or less in the United States.

K.I.D.S. partnered with **First Candle** to establish Safe Sleep Centers that will provide new parents nationwide with educational materials about creating safe sleeping environments for their infants. Parents who receive new product donations through our network of social service agencies will learn how to keep their babies safe during the first year of their lives.

GLOBAL GIVING.COM will match every donation received on the **K.I.D.S. Against SIDS** page by 30 Percent on March 13!

Please join K.I.D.S. on March 13 to fight SIDS in America and help parents sleep better at night.

Safe Sleep Saves Lives!

As a new parent, one of the most important decisions you will make is where your baby will sleep. The following information will help you keep your baby safe from Sudden Infant Death Syndrome (SIDS), suffocation and accidents during sleep.

The safest place for your baby is in a crib.
