## OUR STORY

### Beginning from Bhawana...

Have you been a Child?.. of course we all have been through this stage. What if I would show you few staggering things about India's Child statistics. Does this alarm you, as an awake up call? Think for a moment.

- 40 million Indian children (i.e.1/3rd of total world's children population) between the ages of 6-11 years are out of school in India
- One out of every two young children in India is malnourished
- Only 4 out of 10 girls who enroll complete eight years of schooling

This is just a overview of whole India, But if we narrow down to metropolitan cities the stats are still more alarming. A recent study by media has surfaced 800 active agencies, involved in Child Trafficking across many cities. Friends let me get your notice towards Bhawana Slums, a resettled colony of North Delhi allotted by Government. This vast slum colony houses huge number of families, that live below poverty line. Most of these slum dwellers are illiterate with no job skills to earn a living. Besides this they indulge in all sorts of social evils that even include consumption and sale of drugs, as this fetches quick & easy money. At this prevailing situation, We have identified that many kids have been orphaned due to premature deaths of their drug addict parents. Being sensitive towards these prevailing Child issues, we started sheltering Orphan Kids of Bhawana Slums of North Delhi, which we otherwise call as "AARADHYAN CHILDREN HOME".

## What we Teach: The Principles

### Introducing Our Unique Children Home

How we serve certainly, makes difference than the service itself, not the means but the end is counted: These 3Cs are our distinctive core values, on which we stand, as custodians of these tender lives.

**A. Character Centered Life Lessons:** *Without coercion, each child is taught life-changing moral lessons in culturally relevant methods.*

**B. Child-Focused:** *Our Children Home directly engages each child as a complete person focusing their individual lives.*

**C) Community Oriented Sustainability:** *We are committing to help these children grow in over all development activities identifying to Community prospects.*

## What we Do: The Impact

While being sensitive towards the need of these vulnerable kids we diligently strive to serve, with our best available resources

**Housing:** We provide home for homeless Kids, being supervised by our, in house care taking family, that cooks 3 time nutritious meal for Kids, besides snacks and other eatables.

**Education:** We assist in Kids Schooling, by providing them Uniform, Shoes, Books, Stationeries and other needy things

**Health:** We also have regular health check ups & vaccinations done from time to time, ensuring preventive measures. Indoor & outdoor sports are encouraged to further boost their health.

**Personality Development:** We arrange Occasional field trips and outings to boost their confidence level and thus enhancing their personality development.

## Our Needs & Challenges: Today

Great Needs have Great Challenges, currently our needs are of various types, such as Cash to Kind and People to Pillars. However broadly speaking in the context of this situation we are in need of:

*Volunteers as Promotional Coordinators  
Monthly /Quarterly/ Annual Donors  
In Kind Donations of Dress/Stationeries/Books*

## Our Vision for Future: Tomorrow

To establish better facilities for all these children, ensuring their quality growth

To accommodate and serve more needy children as our capacity grows in terms of our services.

To develop them as self sustaining future citizens, so that they lead a promising and exemplary life.

*We feel the hearts cry, as the number of children who are being orphaned, abandoned, live in destitute conditions are increasing tremendously in India. We are expressing the reason for God's command to "...care for the orphans and widows in their distress." (Holy Bible; James 1.27)*
