

Waterfield Medical Center

October 2025 Surgical Outreach

In October, Dr. Peter Coleman and his surgical team from Monrovia visited Waterfield Medical Center to conduct the second surgical outreach in our newly established Waterfield Surgical Suites. This event marked an important step in expanding our surgical capabilities and providing essential healthcare services to the community. During this outreach, the surgical team **successfully performed surgeries on 49 patients ranging in age from 1 to 73 years old.** The procedures addressed a variety of medical needs, with hernia repair being the most common surgery performed. The team's expertise and dedication ensured that each patient received attentive and high-quality care throughout their treatment and recovery. We are deeply grateful for the commitment and skill of Dr. Coleman and his team, as well as for the opportunity to serve our patients. We give thanks to God for the successful outcome of the outreach and for the positive impact it has had on everyone involved.

Children Served

After a brief rain delay, the annual community Christmas celebration was held at the Waterfield Medical Center. We always look forward to pouring into and celebrating the children in the Kakata community. Our team is grateful for the generosity of our donors and partners who make these annual celebrations possible.
