

RESOURCES FOR RETHINKING

www.r4r.ca

Classroom Resources Database

Developed by Learning for a Sustainable Future, the Resources for Rethinking Database provides over 700 classroom resources that are interdisciplinary and action oriented.

1. Curriculum Links

Connections are made to the K-12 curriculum outcomes for all provinces/territories in Canada.

2. English and French Resources

R4R is a bilingual Canadian website. Resources are available in English and French, and the majority are free!

3. Reviewed by Teachers for Teachers

Resources are reviewed by classroom teachers and meet thorough sustainability and pedagogical criteria recommended in the research on teaching and learning.

Extend the Learning

Programs on www.r4r.ca that provide action opportunities and professional development:

Project FLOW – For the Love of Water

Engages teachers and students in hands-on, action projects that model responsible and active citizenship, preparing students to be stewards of our water resources.

Step Outside – Your Guide to Nature's Events

Provides teachers with guides that highlight the many learning opportunities that occur just outside their school door, in the school yard and neighbourhood.

EcoLeague – Linking Education to Action

Challenges and motivates students and teachers to engage in community and school-based sustainability action projects.

Search for exemplary classroom resources by grade, subject, province or territory, language, and sustainability theme today!
