Logical Framework (Logframe) for QMed's Lectures

	PROJECT SUMMARY	INDICATORS	MEANS OF VERIFICATION	RISKS / ASSUMPTIONS
Goal	Health professionals are aware of and know how to apply four principles of online searching while using PubMed for academics, research or practice	Numbers of residents / others who use our teaching while searching PubMed for academics, research or practice	Forms that participants fill in, which are available in our Google Drive	
Outcomes	Improve the literature search techniques using the Four principles of searching	Improved search skills amongst residents and professionals of any health sciences stream	A small test that we administer one week after the last date of the Institution's workshop	The presentation will be shared with participants, who will go through them again and learn. Participants will fill in forms with the test
Outputs	Lectures are delivered at each institution	No of residents / others attending a lecture	Ask the institution to give the numbers that registered for their workshop and attended the lecture (ask for the list?)	Institutions are ready to give us the data of people who attend
Activities	Deliver a one hour lecture in a three day Research Methodology Workshop that all teaching institutions regularly conduct	No of lectures delivered.	The database that we maintain, certificates that we receive as faculty, random checking with the institution	Medical colleges invite us to deliver lectures
