**Objectives:**

To provide better & quality education to rural poor unprivileged children  
To implement modern teaching method  
To motivate the children to have interest on education  
To provide awareness & need of education  
To increase literacy rate

**Goal:**

The goal of the Present Project to provide quality education at healthy & pleasant atmosphere in modern technique so as to create interest on education in the minds of unprivileged children as well as Parents

### **Theme:**

The project main theme is to provide feeling in the minds of unprivileged children that “**School is better than Home**” by providing quality education to the children and create interest in education for one year or until children succeed socially & educationally

### **Project Introduction:**

The project is proposed to implement in the Badvel that has several villages/ hamlets in which area drop outs are more.

We proposed to select those children as beneficiaries and provide better education which create a feeling in the minds of them that school is better than home. Then they may get admitted in nearest Govt. Schools which provide free education and hostel facility.

Project includes mainly provide *quality education in pleasant atmosphere* like a play school in interesting & modern method instead of monotonous teaching method.

### **Need of Project**

As the selected areas are rural which are undeveloped & unprivileged, the people not interested to send them children to the school. This is because of

Lack of awareness on education

Parents are illiterate

Poverty

Lack of healthy atmosphere

Monotonous teaching Methodology

Social Reasons – backwardness like caste feeling etc.

High fees in Private schools

This result in more illiteracy in rural areas and rural areas are continuing their state of Undeveloped.

So it is quite necessary to provide quality education at healthy & pleasant atmosphere at free of cost to the rural areas.

### **Action Plan:**

Awareness Generation camps on “Need of Education”

Mobilization in selected area

Motivating the Parents/dependents to join their children in the school

Selection of Children belongs to unprivileged & undeveloped area

Selection of suitable trained Staff (Teaching & Non Teaching)

Admitted & categorized the children by considering their age & knowledge

Teaching by Modern techniques viz. by using toys, educational kits, Audio & video equipment

Carry out Sports, Games & exercises in the play ground

Awards & Gifts to children in extra curricular activities for encouragement

Excursion programs

Computer Training Program to provide computer knowledge

Medical Check up to every student periodically

Entertainment Programs

Conducting talent tests and giving gifts for encouragement  
 Joining the succeeded children will be admitted in nearest Govt. Residential Institutions for higher education  
 Joining surplus children in the next academic year  
 Organization will follow up until children succeed socially & educationally
