Theatre in Education

Theatre is one of the most powerful, yet least utilised art forms in education. In the exploration of self in relation to others, the development of understanding of the self, and of critical empathy, not only for humans but also towards the natural, physical and social worlds, theatre is a medium par excellence. Dramatising texts is only one small part of theatre. Much more significant experiences are possible through Role play, theatre exercises, body and voice control and movement, and group and spontaneous enactments. Such experiences are important not only for teachers in their own development, but also for teachers to provide to children.
