

AN INTEGRATED APPROACH TO EDUCATIONAL DEVELOPMENT

SCHOOL-TO-SCHOOL INTERNATIONAL

Our Mission

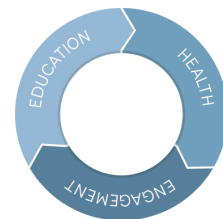

School-to-School seeks to transform education and school health in developing countries so that every child can succeed in school.

School-to-School International (STS) is a **results-focused** nonprofit organization that specializes in program design, implementation, monitoring and evaluation, student assessments, and teacher trainings.

- We have over a decade of experience working in educational development with international governments and agencies, including USAID, UNICEF, and the World Bank.
- We integrate education, health, and engagement in our Whole Child Model because we have learned that piecemeal approaches do not work.
- We build local capacity to ensure broad and sustainable impact.

Whole Child Model

Since 2002, STS has been testing the Whole Child Model in Guinea, West Africa. To date, our programs in Guinea have reached over **8,000 students** in **34 primary schools**, and our local staff and partners have provided management training to **several thousand teachers, parents, and community educators**.

WHOLE CHILD MODEL

Education

STS builds the conditions of success in schools through interactive learning, local language instruction, teacher and community training, early childhood education, and equitable access for girls and boys.

Health

STS creates healthy learning environments by providing medical supplies to schools, constructing school wells and latrines, and facilitating health workshops for teachers and students.

Engagement

STS promotes engagement in learning through community partnerships, school management training, parental involvement in education activities, and cross-cultural learning opportunities.

2013 Campaign

STS aims to raise \$1 million over the next three years to expand the Whole Child Model in Guinea, West Africa. We invite support from individual, foundation, and corporate partners interested in creating productive learning environments for underserved students.

HELP US EXTEND
OUR REACH TO 50
SCHOOLS IN THE
NEXT 3 YEARS

The Whole Child Model is a response to the fact that: if a child is not healthy, if teachers are not adequately trained or motivated, if education materials are insufficient, or if parents and communities are not involved, children are less likely to succeed in school. **STS creates the conditions for success.**

Consulting Services

STS is regarded as an expert in the field of educational consulting, with a broad set of skills in program design and implementation, capacity building, and monitoring and evaluation. Our consulting work focuses on dropout prevention, student assessments, school management, health, curriculum development, and national literacy campaigns.

STS works with individuals, government ministries, non-governmental organizations, private foundations, and research institutions to improve children's education. Currently, STS has projects in 12 countries in Africa, Asia, the Caribbean, and the Middle East.
