

Project Workplan for 2013-2014

This workplan describes the commitment to project work between GlobeMed at Rutgers and CSSD for September 2013 - July 2014. This workplan may but does not necessarily include the workplan for on-site visits to CSSD by GlobeMed at Rutgers, nor does it include any smaller or less intensive projects that may come up throughout the year (such as research ideas).

I. Project Description- “HIV/AIDS Prevention and Health Education Program Among Women Entertainment Workers”

A. Description of the project:

Objective 1:

- Create targeted behavioral changes among Entertainment Workers that emphasize risk reduction and promote safer sexual practices.
 - The outreach workers will work with GlobeMed at Rutgers to create culturally sensitive and scientifically accurate sexual health education modules. Outreach workers will incorporate these modules, which will cover health education about unexpected pregnancies, abortions and hygienic practices, into the group discussion sessions with EWs.
- Entertainment Workers will attend group meetings led by CSSD peer facilitators and staff outreach workers where they will discuss HIV/AIDS, STDs, and general sexual health related education. The discussions will support and foster the development of sexual health risk management through practical health education facts and guidelines.

Objective 2:

- Build a supportive environment for EW sexual health by mobilizing stakeholders such as entertainment establishment owners, healthcare providers and others
- Entertainment Worker's stakeholders will meet quarterly to discuss the realities of the issues EWs are currently facing, including their causes and consequences, and how to get EWs equal opportunity to access health care services.

Objective 3:

- Promote and increase access to health information, products and services for EW's. CSSD will work to decrease stigma and discrimination focused towards Entertainment Workers so that health care providers will be willing to provide them health care services and education.

B. Intended Project Impact:

- Decrease stigma and discrimination surrounding women entertainment workers in the capital city, Phnom Penh.
- Provide the means for a supportive community where entertainment workers can discuss the issues they face, learn about safe sexual health and hygiene practices, and reduce

their risk for getting HIV/AIDS and other sexual health related conditions (STIs and general sexual hygiene issues)

- Mobilize those in the communities, such as entertainment establishment owners and health care providers, to come together to discuss how to get entertainment workers access to health care services

C. Measurement of Project Impact

Level	Indicators
Impact	HIV Prevalence and General/Sexual Health Practices Knowledge among Entertainment Workers (EW)
Outcome	Knowledge about HIV prevention among EW; Knowledge of safe, affordable, and effective general/sexual health practices among EW (assessed through annual survey which tests this knowledge); Consistent condom use by EW; Condom use with last male partner by EW; Condom use at last sexual encounter by EW who received an HIV test in the last 12 months and knows the results; Level of relevant stakeholder (including staff members and target beneficiaries) participation in CSSD program planning, implementation and monitoring and evaluation [(0) non-participation, (1) passive participation, (2) influence, (3) partnership and (4) self-mobilization]
Output	750 of entertainment workers reached; 240 of EW referred to appropriate health services; 120 group discussion sessions conducted and 2 semesters meeting conducted with relevant stakeholders.

II. Chapter Objectives for Project

- Raise \$5617.00 through fundraising on campus and individual giving.
- Spread awareness of the project and CSSD's mission on campus through campaigns.
- Keep CSSD updated on progress of fundraising and impact of campaigns on campus.

III. (GROW Internship 2014)

The GlobeMed at Rutgers chapter:

- Facilitate with CSSD staff to adjust and analyze annual survey
- Conduct observatory research on-site with entertainment workers at communities
- Train CSSD staff regarding data entry, analysis, and interpretation
- Train CSSD staff to conceptualize, design, and implement new projects
- Train CSSD staff in spoken and written English
- Conduct workshops for CSSD staff regarding grant writing and annual report writing
