

Light of Life Trust

Project Anando

Case Profile

Hansa*, Std X, Gevrai Bazaar Centre:

There are six members in Hansa's family – her grandmother, father, mother, younger brother and sister & herself. All of them live in one room mud house. Her father and mother work infrequently. The monthly joint income of the family is approximately Rs 2000/-. Her grandmother is aged and is not capable of doing any work. Her father is educated up to Std III and her mother is not educated. Her younger brother and sister are studying in Std IV & Std III respectively.

Her father is always suffering from stomach pain and hence is not able to work often. Her mother is also suffering from Blood Pressure problem since the last 5 years. Since both her parents have medical problems, Hansa goes to work on daily wages two days a week. As there is no earning member in Hansa's family, her whole family is dependent on Hansa's maternal uncle who provides them enough help to fulfill their basic needs. Hansa supports them partially with the income she gets on daily wages.

The LOLT Anando social worker met her maternal uncle at his home and made him understand the need for him to help support Hansa's family more so that Hansa can stop working and concentrate on her studies in this crucial year. Finally the social worker managed to convince him and he agreed to take over the entire family's responsibility so that she can concentrate on her studies and work towards achieving good marks in the Std X (SSC) exam.

The social worker has a good rapport with Hansa and continuously gives her moral support to build her confidence and help her to move towards achieving her dream of becoming an engineer.
