THE OPEN CHALLENGE OF GLOBAL GIVING

During the months of November and December of last year, CEDNA started the Open Challenge to raise \$ 5,000.00 to implement the activities for the health project "Improve the nutrition of 150 children in Cusco" which will start in January 2014.

With the support of many people from different countries we achieved this great challenge and we thank everybody who participated and donated for this project to help the most vulnerable children of Cusco.

Christmas celebration with the families of our projects

Also this year we had the opportunity to celebrate with the poor families and their children Christmas in their communities.

Thanks to the support and love of many people who donated for this project, CEDNA was able to give to approximately 500 children from the communities of Fedetracc and Patron San Sebastian near the city of Cusco a very special Christmas event. We had a great time with them and they really loved it. There was a clown, they received the famous Christmas bread (biscocho), chocolate milk and of course their Christmas present. Who hope we can continue this event next year.

START OF THE HEALTH PROJECT JANUARY 2014

“Improve the nutrition of 150 children in Cusco”

IDENTIFICATION AREA OF INTERVENTION

CEDNA began in January with the project's diagnostic, by visiting the vulnerable areas of Cusco with families and their underfed children to get the necessary information of the population. This with the support of the health centers, who can give us more information about the nutritional status of the children.

The specific information we received:

- ✓ Information about actors related to health, such as health centers, health-promoting mothers, other institutions and organizations involved.
- ✓ Information about the population with children under 6 year with malnutrition levels.
- ✓ Information about the main economic activities of the families.
- ✓ Information about the health habits such us: food, healthy housing and family health.
- ✓ Information about the conditions for installing organic gardens.

We identified the following communities “Association Paraíso de Fátima” and “Satélite” wich are located in the district of San Sebastián near the city of Cusco. With this communities we will work during the execution of the project.
