The Starfish parable

An old man had a habit of early morning walks along the beach. One day as he looked down the shore he saw a human figure moving like a dancer. As he came closer he saw that it was a young woman and she was not dancing but was reaching down to the sand, picking up starfish and very gently throwing them into the ocean.

“Young lady, why are you throwing starfish into the ocean?”

“The sun is up and the tide is going out, and if I do not throw them in they will die,” she replied.

“But there are millions of them, what difference can it possibly make?” he asked.

The young woman listened politely, paused and then bent down, picked up another starfish and threw it into the sea, past the breaking waves, saying “It made a difference to that one!”
