

FAME Alumni

Get involved! Reach out, Volunteer and Give With A Generous Heart.

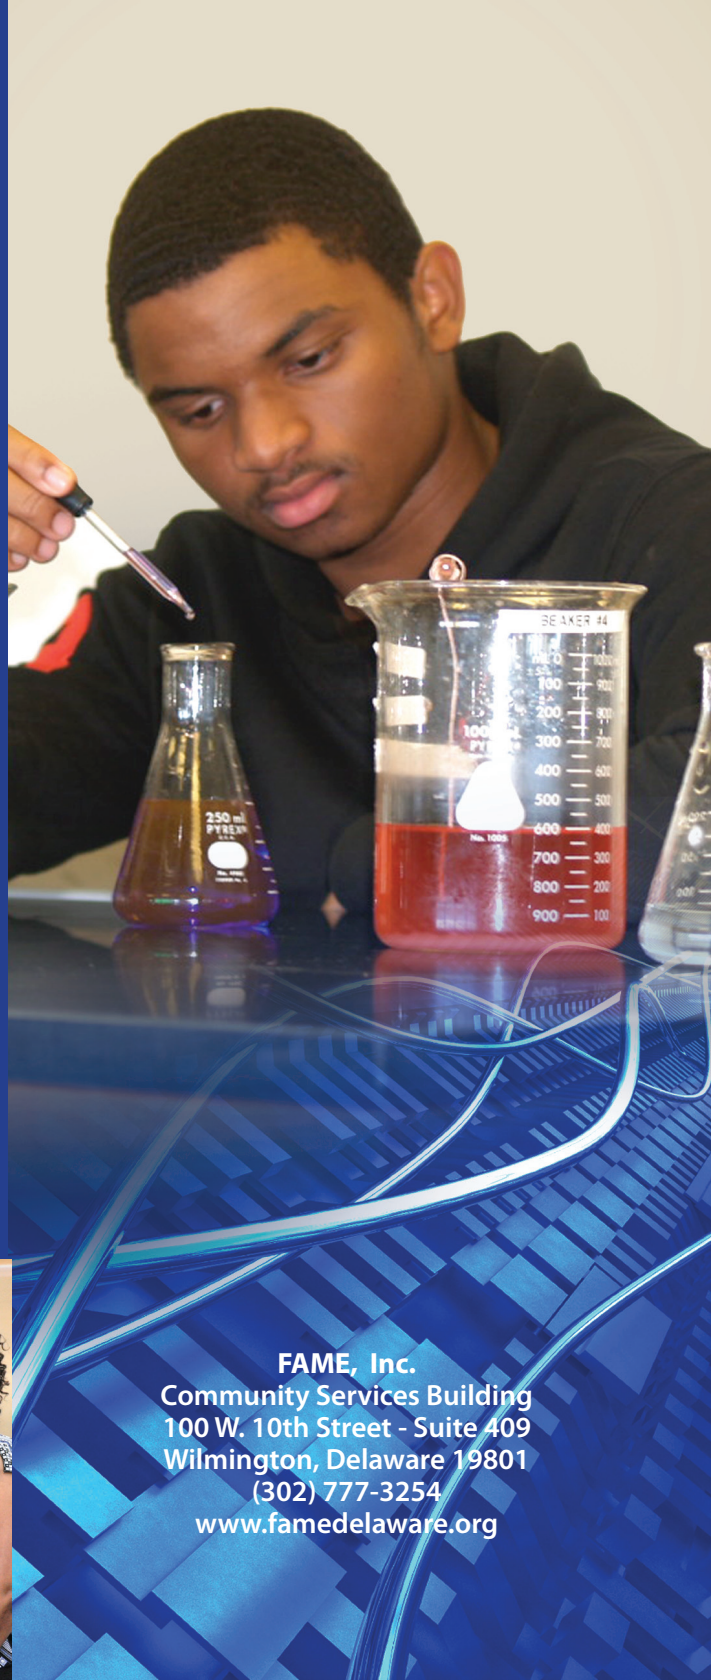

FAME Alumni demonstrate the success of the program. We welcome you to reach out and let your voices be heard. Share your unique stories and describe the benefits and rewards that you have gained from being a part of such a life changing experience.

Reconnect with friends, instructors and individuals that impacted your life. FAME was and continues to be a dynamic program that brings students together from different districts, schools, households, and backgrounds all in an effort to prepare and motivate them to strive for excellence. Looking back we can see how powerful FAME has been in helping to shape our lives.

Today, as we grow and build with technology, we ask for your support. Please share your skills and life experiences so that our future engineers, scientist, mathematicians, business professionals and entrepreneurs benefit from your collective wisdom.

Please visit www.famedelaware.org and click the Alumni link to reconnect!

If you are not an Alum but you would like to support FAME or learn more about our programs we invite you to visit us online.

Preparing the Next Generation of Minorities and Women in Science and Engineering

Forum to Advance Minorities in Engineering
since 1977

WWW.FAMEDELAWARE.ORG

FAME is a pre-college enrichment program that prepares and motivates traditionally underrepresented minority students and girls in grades 7-12 to enter college and complete a baccalaureate degree in engineering, science, math or technology related fields of study.

The program consists of a 4-6 week summer enrichment program, a school year extension and enrichment program on the 1st and 3rd Saturday of each month, college preparation seminars, test awareness programs and other special events and activities.

Since its inception, FAME has served as a direct link for students to industry leaders. Our students enjoy such benefits as internships, scholarships, and rare opportunities to interact with top executives, engineers, scientist, and technology specialist working for Fortune 500 organizations. Many of the aforementioned professionals are FAME Alum.

Objectives:

- Establish local action activities in support of the goal of the National Action Council on Minorities in Engineering (NACME). That goal is to increase the number of Blacks, Hispanics, Native Americans and other underrepresented minorities on an educational path leading to a baccalaureate degree in engineering.
- Motivate students to pursue and succeed in science and math required for acceptance into colleges of engineering.
- Expose students to cultural, academic, and industrial environments.
- Provide minority engineering and technical role models
- Develop a broad-based, long-term community commitment.

Since 1977, FAME has served more than 4000 students. More than 1000 students have successfully completed the program matriculating through from 7th - 12th grade. 99% of the students that complete the program go to college. 65% of FAME students pursue baccalaureate degrees in engineering or science related fields of study.

Our Activities Include;

- A summer enrichment program
- A school year enrichment and maintenance program
- College skills preparation and course selection workshops
- First Robotics for middle school and high school students
- Student Council
- Etiquette and life skills workshops

Other Activities Include:

Test Awareness Workshops are offered for all students and aims to familiarize students with test taking techniques and procedures associated with standardized testing instruments such as the Scholastic Aptitude Test.

College Activities Seminars are held for Juniors and Seniors.

Peer counseling and role models to prepare younger students for more demanding phases of the program, i.e., the on-campus activities at the University of Delaware.

Job Readiness Training is designed to ease the transition from school to the working world for senior high school students who will be entering the summer employment phase.

Special Events are also offered throughout the year. These include tours of the supporting corporations, cultural events, social outings and more.
