

### **Help them see the world!**

FMH has been a great source of hope for many people. It provides free cataract treatment to the deserving community. 114 patients received successful Intra-Ocular Lens (IOL) treatment at FMH in the month of February, 2012.

In the picture above, Afzal is being given an eye-check up. He has a family to support and he could not finance for the treatment and was postponing it since long. With the help of FMH, his treatment was completed successfully.

The families of patients who received the treatment were extremely grateful for the free services being provided. We thank all our donors who helped a number of deserving patients. There are many others like Afzal, who depend on us to help them. Let's join our hands and help them see the world!
