

Contractor evaluation report

#12

Untitled	
Your name	Paul Sadat
Date of your visit	Wednesday, July 29, 2009
Email for org	info@healthandwater.org
Telephone number for org	2540202734261
Country	Kenya
Organization visited	Health and Water Foundation (HWF)
Project Visited	Select
5.1.1. Networks and collaboration with other NGOs	Good
5.2.1. Project strategy was developed with beneficiaries' feedback	Average
5.2.2. Project activities designed to achieve intended outcomes	Average
5.2.3. Project delivering results	Average
5.2.4. Project can be scaled up or replicated	Average
5.3.1. Staff manage project with an outcomes mindset	Average
5.3.2. Staff learned from mistakes and transform their project	Average
5.3.3. Project activities and outcomes are monitored through beneficiaries' feedback	Average
5.4.1. Organization tracks expenditures well	Average
5.4.3. Leverage: association with GlobalGiving increased the project's ability to attract other outside funding	Average
5.4.5. how close will project be to financially self-supporting when complete?	Average
5.4.5. Environmentally sustainable project (resource conservation)	Average
5.5.1. Community supports project with donations or gifts in kind (>50% community match = excellent)	Average
Percentage of requested budget received by project at time of evaluation:	25-50%

Percentage of overall budget provided by community served:	0-25%
Percentage of overall budget from non-community non-globalgiving sources:	50-75%
Project leader's estimated overall progress towards stated outcomes on GG website:	50-75%
5.1. Collaboration List partnerships involved with this project. Reason for each interaction?	GLOBAL FUND- Give funding and support towards sanitation. OAK FOUNDATION(UK)-They Provided and help in building of latrines to various schools. HALCROW FOUNDATION-Helped in provision of water harvesting equipments and latrines,FMG trainings and classroom construction.
5.2. Governance Your overall impression of the staff, its management style, and culture. How do beneficiaries provide direction?	We could not give a conclusive take on this as we were not able to talk directly to any of the beneficiaries.
5.3. Short term outputs = long term outcomes? List immediate results. Explain what the outcome(s) may be and how the organization knows it is making progress towards these outcomes.	1.The Organisation knows its making progress towards these outcomes since waterborne diseases have gone down,this is from reports from the ministry of health and local health facilities. 2.Communicable diseases have also been reduced by the washing spots introduced and the teaching of children on personal hygiene. 3.Absentism in school has clearly been arrested. 4.Communities are becoming more enlightened on the beneficial values of rain water harvesting.
5.4. Value Have results been delivered (or services rendered) to the community in a meaningful and cost-effective way?	Yes the results have been delivered to the community in a meaningful way as they now understand how cheap it is to have a personal health and the positive impact of maintaining self hygiene
5.5. Learning (Do insights from project implementation result in adaptation or focusing of particular activities? Are donors and beneficiaries able to appreciate the thinking behind the project?)	The Donors and beneficiaries are able to appreciate the thinking behind the project since its main focus is on personal hygiene.
5.6. Expenditure narrative Provide a narrative summary of how disbursements from GlobalGiving were spent.	We were not able to see the expenditure report as the accountant was not present even though they promised to mail it the next day we have yet to receive one.
5.7. Beneficiary roles How do the people served propagate this service to others or give back to the community?	People served propagate this service to others by spreading the gospel of good hygiene and how beneficial it is to the community in general.
5.8. How is this project supported by the community?(labor, gifts-in-kind, leaders promote it, etc.)	The project is supported by the community as when projects and construction is going on,the members of the community provide free labour.Stones and building bricks are also contributed.The community also offers to cook and provide lunch during when construction works are going on
5.9. How will project continue when funding is complete? How will the focus change in the next iteration of this project?	The Project will be able to continue when the funding is complete ,basically because its a project thats geared towards the teaching of personal hygiene and how to utilise natural resource like the harvesting of rain water in the achievement of the same.This is quite achievable as it rains throughout the year in western province,where the project is based

Checklist for additional deliverable items.
Check if completed.
