

Dear Mr. Anderson,

I put my effort especially into the restaurant and service class for the sake of the summer intensive job training. I worked at three departments such as drink service, accommodation and culinary at the resort hotel. The experience working at the hotel gave me a very good experience which I could not learn at school and I could learn deeply about service. The work I did was not always easy for me but a good experience. I became mentally and technically matured after the training. And it made me dream more to be a hotel staff. I would like to make more efforts for job hunting and certification exams during the rest of my school life.

Thank you.
