
Diema's Dream Fund (Russia)

Global Giving Project :
Help to 100 most disadvantaged
orphans (disability)

2014

Help to 100 most disadvantaged orphans with disabilities to start walk, to obtain life skills and have a better quality of the life!

Summary

Diema's Dream Fund helps the most disadvantaged orphans with disabilities in Russia to develop mentally and physically and improve their quality of life.

Summary

By our project, these children are learning to walk, acquiring social skills and showing great results!

It is a human right for every child to learn and reach their fullest potential.

What is the issue, problem, or challenge?

When a child is born with severe mental and complex physical diseases, the parents give them up to the State because they have no financial means to care for them.

The child spends his life within 4 walls in an institution where outsiders are denied entrance.

What is the issue, problem, or challenge?

In Russia, 29,000+ orphans have a disability. Most of them have mental and physical development disorders – Downs syndrome, cerebral palsy and autism.

Unfortunately, the Social Protection Department only provides self-sustaining care.

There are no teachers,

no education,

no development.

Children lie in cribs until their death.

How will this project solve this problem?

We have a rich and unique experience of habilitation and development for these children. They show us they can achieve life skill milestones and break the stereotypes.

How will this project solve this problem?

We organize diagnostics, consulting physicians, life skills teachers, speech pathologists and teachers provide special individual sessions.

Potential Long Term Impact

After 8 years of working with **one** of the groups in the orphanage, 95% of children previously doomed to die in their cribs are now out of bed and walking!

Potential Long Term Impact

Our experience cannot be hidden.

We bring it to the attention of all Russians to show them **There is Hope for these children!**

We hope that our Project will bring about social awareness and that our Program will be adopted by the institutions for orphans with disabilities.
