

# Future Families

Vision: To empower families to create their own future

Mission: To provide care and support to families infected and affected by HIV/AIDS to ensure that children in need have a safe environment in which they can reach their full potential.

**Future Families** provides care and support to families infected and affected by HIV/AIDS to ensure that children in need have a safe environment in which they can reach their full potential. Future Families was launched on 1 October 2010 as an independent registered non-profit organisation (NPO) caring for 8000 orphan and vulnerable children (OVC) infected and affected by HIV/AIDS in Tshwane.

We mobilise communities to provide safety networks for OVC and their surviving family members via professional social workers and a network of specialised care workers. Our hierarchical staff structure that facilitates reaching these large numbers of children cost effectively, is recognised internationally for its innovation and uniqueness.
