THE FOUNTAIN OF LIFE CENTRE'S MONTHLY NEWS LETTER MAY/2014

GOOD NEWS!!!

"Are you tired of cooking with charcoal & paraffin," think of a fireless cooker.
FLC will be raising funds online on global giving website come 1ST TO 30TH JUNE

The link will be shared on 1st June 2014 when the fundraising will start welcome and be the first to donate . ***Thanks***

The Fountain of Life women self help group is among many projects around the world that will be competing in raising funds online through the global website platform.

We are excited having our project approved to raise funds which will be used to promote development in our county. We invite you to make us shine in this special opportunity that we have at hand. What you need to do is to go to the projects link and donate online.

Project Activities

Since the group was formed we have achieved some of our goals of empowering our members .Several training have be held and some of training has resulted to self employment and skills of making items that are generating some income to the groups,. The projects are making fireless cooker.

- A fireless cooker was introduced to help our members cooking food.
- Its cheaper and affordable to everyone.
- This fireless cooker can cook all kinds of foods.

Visit our centre and you can be shown how it works.

Our vision is that every home to have at least one fireless cooker. We believe that this will be one way of saving the environment by reducing the cutting of trees in search of firewood and burning of charcoal.

Another project is that of making beads from waste papers.

Beads made of waste papers

The waste papers that seemed to be at rate in polluting our environment now can be turned into beauty products and be a cash project.

We have made nice necklaces and bangles from this waste papers and are in the markets..

We are looking for funds so that we can train others, this necklaces are found in our centre.

A donated water tank

We are now raising funds that will help us reach more community members with clean water so that we can reduce the water borne diseases like Typhoid which as really affected our community members. We hire lorries which brings water to the homes of our members . At home we have build water safety tanks.

Music Ministry

We have several albums recorded by the group members.

The albums are sold to support the needs of the family and has been bringing together many artists, during this kind of meetings we are able to share to the community members of how we can change our life styles by being involved in projects that will earn us some income.

In such meetings we have been able to address the cases of child rites abuse, sexual harassments and drug abuse. This has been a platform of preaching peace to our community members. This kind of events has brought together people from different tribes and as they interact we reduce tribalism headlines. Now tribes can intermarry, they can do business together and even support one another when needs arises.

Self Supporting Business

Our members have been encouraged to learn independent business such as Po-sho meals, shops, dairies and selling second hand clothes. Others are working as house maids.

This pictures below shows some of those who have benefited from our centre, girl child issue are also addressed..

A 13th yrs old street girl

A member running her posho mill

Girls assisted to access sanitary towels, education and feeding programs.

A member trained and now running a beauty Salon

Girls and women are assisted to access sanitary towels and other reproductive health. Services many families were unable to access sanitary towels and some due to customs they cannot ask heir parents to provide
