

2013 In Retrospect

The year 2013 was another year that came along with many new things of its own. During this year, Green Cameroon experienced its highest intake of both foreign and national volunteers, when compared to other years since its creation. The general level of activities also saw a significant increase. More partnerships were formed, new projects introduced and new communities reached. It was a very challenging year as extra financial resources were needed to match up with the hike in activities, but a dedicated team, supportive partners and collaborators saw the organization through the year with satisfactory results. The entire Green Cameroon family wishes to thank all those individuals and institutions that contributed to this success and wishes them Many Happy Returns and a Prosperous 2014

The Green Media Campaign

The Green Media Campaign was launched by Green Cameroon in January 2013. The Campaign is aimed at increasing general community awareness environmental issues and getting government and citizens actively involved in the protection of nature. The program is currently ongoing as it was envisaged to run for two years.

Our Plan for the Future

- The extension of our activities to more schools and communities within the region.
- The implantation of more practical projects in the schools we work with.
- The building of a Multi-purpose Environmental Resource centre, in Buea.
- Securing more training and sensitization equipment to meet increasing need for environmental sensitization and training on advocacy.
- Capacity building and enlargement of staff size for better results.
- Going into more partnerships for sharing of resources and networking

Green Cameroon 2013 Annual Report

Environmental Education

With a dynamic team of volunteers from across the world Green Cameroon started work on the development of an environmental education Manual. This manual is intended to make Green Cameroon's work with our schools and communities more effective and also enable to reach more schools than our current staff can

International Cooperation

Green Cameroon joined the international community to observe the World Environment Day, World Desertification Day, World Biodiversity Day, World Youth Day and other globally significant days. Contribution on these days included publication of articles, organizing talks, conferences seminars, workshops and much more.

Community Development Program

With the help of our volunteers from around the world we were able to develop the following programs in communities of the Mount Cameroon Forest Regions;

- Hope from the farms: A project to alleviate poverty, fight youth unemployment and get Cameroonian youths involved in agricultural activities.
- Adopt A Tree: aimed at involving community members in the protection of biodiversity in return for small scale community development projects
- Green Orphanages: Extending our school environmental club activities in orphanages of the South West Regions

Sources of Funding

We are financed by membership contributions, fundraising, grants, benevolent donation from the public and the community we serve. We appreciate donations from donors both national and international in form of material or cash.

Finances

Apart from membership dues and other donations, we received financial or material support from;

- StepStone Belgium
- 1% Club
- Tufts University
- Global Giving

Our sincere appreciation goes to all these institutions that showed their interest in our activities by supporting us financially towards the achievement of our goals. The entire Green Cameroon family wishes them Many Happy Returns.
