

DEMOGRAPHIC
REPORT
2018

Introduction

Currently Mammadu is serving approximately 65 students* whose ages range from 5 to 15 years old who come from a variety of backgrounds. Some of them are enrolled in private schools like Hermann Gmeiner, while others attend the public schools in Otjomuise. The older children are in grades 1-7 at either the public or private school mentioned previously, while the younger children are provided with a certified curriculum for a pre-primary education level at Mammadu. In addition to the pre-primary class, Mammadu offers a Kindergarten class as well. The following graphs show previously requested demographic information of the children and their families at Mammadu.

*There are a few children who “drop-in” for meals/activities; some of them frequently and some infrequently. These are children who have previously been enrolled but have moved out of the area; or children who attended pre-primary, are now in grade one at a school other than Hermann Gmeiner but might have an older sibling who attends Mammadu.

Genders

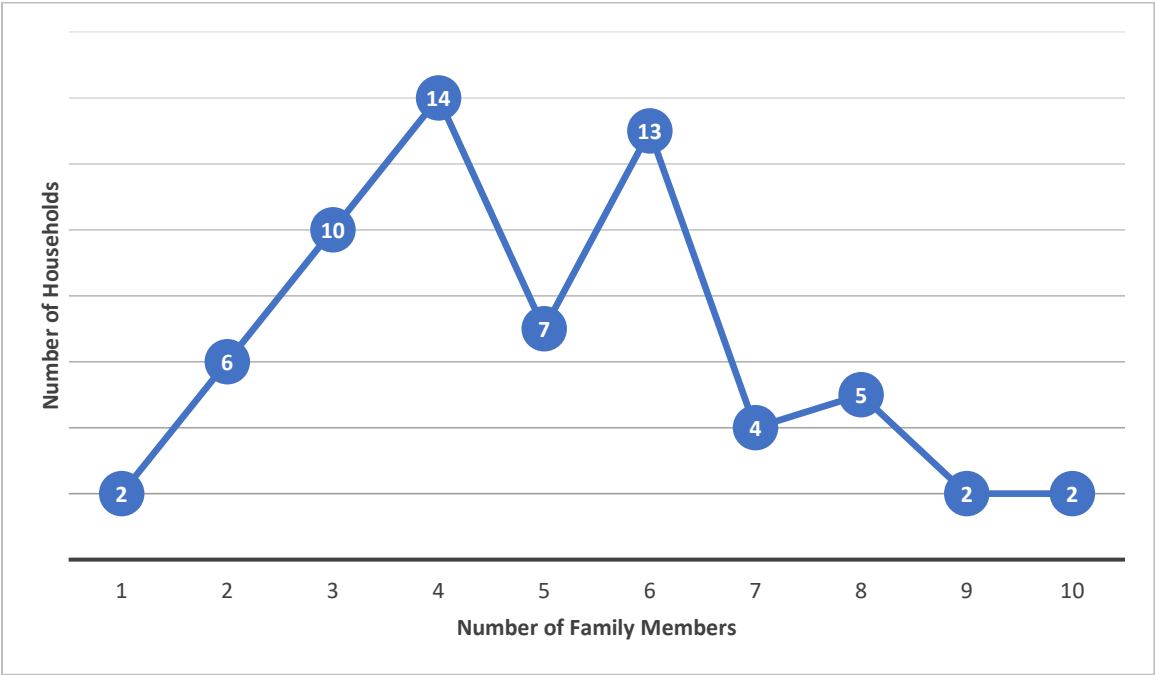

Mother Tongues

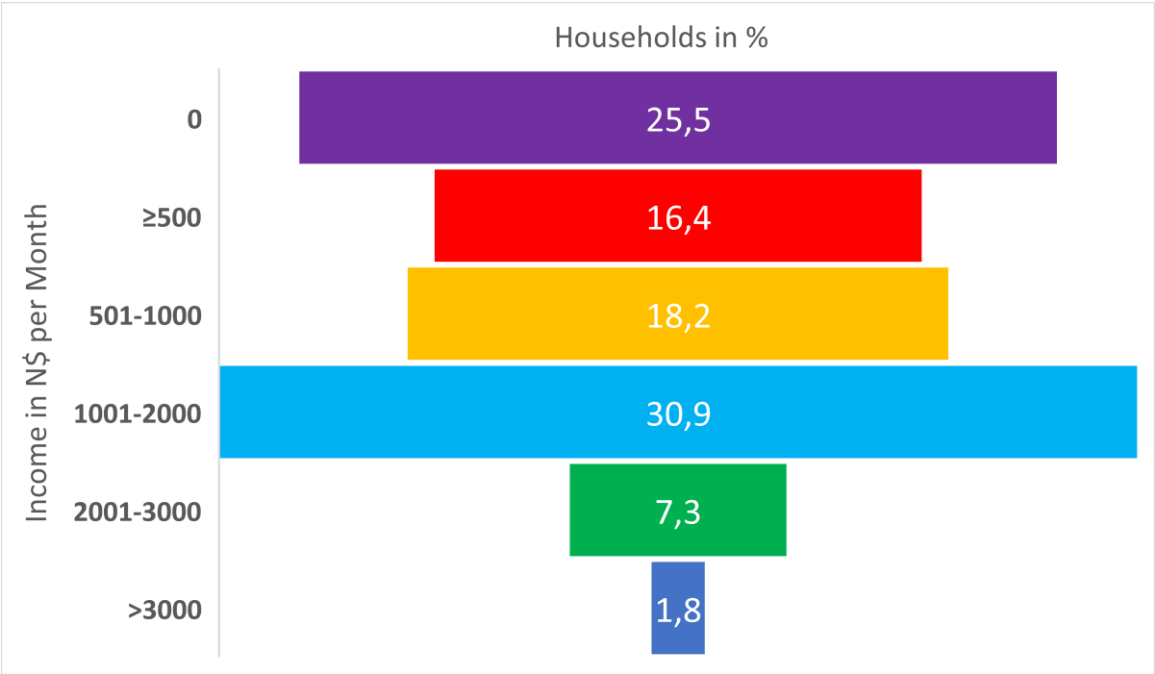

Most of the children speak more than one (besides English) language at home. The mother tongue, as presented by the above diagram, is referring to the main language spoken at their home. The main language spoken by the majority of the children at Mammadu Trust is Otjiherero or Oshiwambo. Still there is a fair amount of variety given as there are about 20 % other types of mother tongues.

Household Occupancy

As the above diagram displays, most households consist of 3 to 6 family members. Yet there is a high percentage of extended families. Therefore, the average of 4.9 people living in one household is high.

Household Incomes per Month

The average household income is about **N\$945 per month** which equals 63 € or 70 USD which needs to fulfil the needs of an average 4.9 people living in a single household as mentioned previously in the Household Occupancy.
