

Quarterly Report

December 2014 - January 2015

By Jennifer Snell and Sophia Kim

Mobile Clinic Continues to Save Many Lives in Kenya...

Here are some great impacts we have made in the last two months:

Immunization

1,137 patients received Immunization

Immunization rates in Marakwet County are unacceptably low (< 70%). Nearly one-third of children are at risk of serious illness. HealthRight is working to even the odds for these children.

Deworming Medication

1,266 patients received deworming medication

In 2013, nearly 15% of all child deaths were due to diarrhea in Kenya. With HealthRight's support on diarrhea prevention, fewer children will die from diarrhea.

Antenatal Care

364 women received antenatal care in their village

Only 20% of women in Marakwet seek antenatal care in facilities due to lack of transportation. HealthRight hopes to reduce deaths of newborns and mothers during delivery by providing mobile antenatal care.

Family Planning

177 patients went through family planning education

High fertility can impose costly burdens on developing nations and women's health. HealthRight's mobile clinics are trying to fill the unmet need by providing family planning education and contraception.

In total, Mobile Clinic project reached 2,886 people in 2 months.

Each month, HealthRight continues to support 20 mobile clinics (10 each in Marakwet West and East). Mobile clinics provide growth monitoring for infants, prenatal care for pregnant women, immunizations, deworming medication, first aid, treatments for diarrhea and malaria, and family planning education.

We wanted to let you know that your contributions to this project make a tangible difference in the lives of people living in Marakwet, Kenya. Bringing life-saving health care services directly to people in these poor communities means healthier babies and children, mothers, fathers and families.

The work continues but funding is in short supply. Please consider sharing this report and telling your friends and family about our progress. It can make all the difference in the world to us and the families we serve. Feel free to continue to follow our progress of PMNH+ project through our website:
