# COLORECTAL CANCER SCREENING SAVES LIVES

Dedicated to a World Without Colorectal Cancer™

The Colon Cancer Challenge Foundation was founded in 2008 with a mission to reduce colorectal cancer (CRC) incidence and death. More people are getting screened and beating colorectal cancer as we:

- Increase awareness about the importance of early screening
- Develop public/private partnerships with health professionals and national organizations to increase knowledge and CRC screening rates
- Increase awareness of CRC risk factors and factors that may help prevent CRC, including family/genetic history
- Raise and provide funds for screening services to the underserved
- Award translational research grants to study genetic and epigenetic changes that will lead to new breakthroughs in the prevention and therapy of CRC

**Join us in the fight against colorectal cancer.
