
Together with childrens in time of COVID-19

Since March 16th, the date on which Ecuador's government decreed confinement measures, Foundation Together With Children JUCONI adapted its model of psychosocial care, to perform emotional containment of fear of death and loss of family members, due to the fact of COVID-19.

zoom attention during confinement

A protocol for attention through phone calls, WhatsApp and via zoom to families with connectivity and devices was designed, allowing continuity of care activities for children and their families.

The suspension of economic activities as protection measures against COVID-19 impacted very strongly the families we serve, whose economy depends on informal work and where many heads of households are single mothers and seniors.

With the support of several organizations, humanitarian assistance was provided to the children and families we serve, as an important contribution to ensuring the feeding of children.

Food aid to families

Returning to our face-to-face activities:

After the confinement measures were suspended, face-to-face activities in the Socio Vivienda 2 and San Francisco sectors in northwestern Guayaquil were resumed since July 16th. Both home visits of psychosocial and therapeutic intervention, as well as spaces for the prevention of domestic violence and drug use.
