### **Vardi – Village Peepad**

Vardi is in her late twenties. She lives with her husband Dalpat and three children in village Peepad. Vardi and her husband both work as laborer. Her first two children (one son and one daughter) have received all vaccinations from the Government hospitals. She comes to the Immunization Camps being run by Seva Mandir to get her seven-month old daughter vaccinated. Since she works as a laborer she has to take special leave of an hour to come to the Camp for vaccination. Before she had to go out of the village to get her children vaccinated. It means losing a day's wage i.e. Rs. 60 to 80/- for one day. She is happy that she does not have to go so far for immunization.

She knows the significance of immunization and she wants her children to stay safe and healthy.
