

Uruguay against child sexual exploitation

During this period the goal of the project was to accompany and monitor the institutions that are part of the network and participated in the training camp for the prevention of sexual exploitation of children and adolescents in June.

Follow-up meetings were held during this process by the team of claves to accompany and monitor the activities that were planned and carried out. At the same time, the different groups trained both in Montevideo and in other parts of the country, carried out various activities, workshops, talks, public events in their institutions, churches and places of reference to raise awareness on this issue, being able to share what they learned at the camp and multiplying the network of protection for children and adolescents.
