### From Vision to Impact:-

**Our vision** is the world where every child grows up in a lovely and secure family.

**Mission.** We professionally assist families, communities and governments in their work to ensure the rights of every child to live and develop in a safe and secure family environments. Our main focus until 2015 is to prevent separation of children from families and placement in institutional care; support and strengthening parental capacities of vulnerable families; support to children leaving care.

**Selvendran Murugamalai on behalf of KRDA-NGO** has spent his career working to promote the health and development of vulnerable children and women, working with other NGOs, Save the Children in Tamilnadu State-India, and heading one foundation –**Kodaikanal Rural Development Association (krda)** in Tamilnadu. From 2002-14, Selvendran has conducted hundreds of women and child development programs.

Despite the fact that millions of children were living with HIV and AIDS, and many of them had been orphaned by the epidemic disease , information about their care and support was virtually absent from the family.

Several colleagues who were there shared their dismay, Thavamani from the rural area, Deepak from students & College area. Selvendran and his colleagues agreed that children deserved a more prominent and substantive place on this international stage to influence policy and program decisions. .

We continue to seek out opportunities to improve services and health outcomes for children around the world. The dedicated members work tirelessly to get children the programs and resources they need to lead healthy and productive lives.
