

**Training on the
Epidemic Prevention ,Personal Hygiene and Choking Intervention such as
children who have choked on food, foreign objects placed in their mouths, or in
drowning hazards for Preschool teachers at Phong Dien District
in school year 2015 - 2016.**

In the partnership frame between the Department of Health Service of Thua Thien Hue province and the Medical Education Development Resources International Exchange (MEDRIX), on December 5th, 2015 The Center for Preventative Medicine of Thua Thien Hue Province and the school medical center (Center for students health services) – Department of Education and Training have organized a training courses on Epidemic Prevention ,Personal Hygiene and Choking Intervention such as children who have choked on food, foreign objects placed in their mouths, or in drowning hazards for Preschool teachers at Phong Dien District in school years 2016-2016. Total participants participated to the training course is 52 teachers and schoolmasters, school medical staffs from 25 preschools of Phong Dien Districts. Training course has provided the knowledge and skill on disease prevention in schools, practice handwashing steps with soaps, personal hygiene for children and practice choking intervention when the child have choked foreign object or drowning hazards. The class was very welcomed by the participants and was very useful for the preschool teachers.

According to the plan, the course will be organized on December 12, 2015 the staffs of Phu Vang District Education office and all the teachers of the preschools in Project areas of Phu Vang District (Phu Xuan , Phu Luong) and Phong dien District (Phong Binh and Phong Chuong) Total participants will be trained in December 12 is 162 people.

Here are some pictures of the first training courses in Phong Dien District.
