Dear Robert:

Our sincere gratitude is extended to you for your donation of computers and software for Frederick Douglass Christian School. We appreciate your willingness to support the academic achievement of our students while enriching the lives of children from Pre-K through 5th grade. Your donation helps to facilitate our ongoing efforts to strengthen our students' reading, writing, and math skills through updated technology.

Your contribution of the 17 computers loaded with academic software will make it possible for teachers to schedule a Computer Lab Class several times a week. We will also use the Computer Lab class to demonstrate to parents how they can help the children at home.

At FDCS, we are dedicated to the positive development of young minds, and we have a commitment to continuous improvement through faith, love, and education. You are a true blessing in answer to our prayers for participation and support of our goals and vision to achieve academic excellence in the community.

In Christ,

Janice S. Bowdre, Ed.D.
Head of School
