

My name is Danielle I have five children that attend the Upper Merion School district. We live on a budget, so there are things that are needs, for instance a laptop, that we cannot afford. My family will benefit from having access to a laptop at home in many ways. My oldest daughter is a senior who attends the Allied Health Nursing program through the tech school. She inspires to be a doctor one day. Recently, she enrolled into classes at Montgomery County Community College. By having a laptop at our home this will help her successfully complete her classes, so she can enroll into the nursing program offered at Montco.

My other high school student is a fresh man at Upper Merion High School who wants to become a cosmetologist. She will use this laptop do her assignments, so she can get good grades this year and enroll in the cosmetology program through the Tech school next year. My middle school student has dreams of being a teacher. She will use the laptop to complete her homework and continue to get good grades, so she can go to college. My other daughter in elementary school enjoys learning new things every day. She loves going on the learning app like class dojo and Brillkids. Brillkids has been an amazing app for her because it helps her sound out words that she does not know. It also helps her learn how add and subtract easier. By having access to a laptop at home, she can log in and practice her reading and math skills.

My son who is the youngest of the bunch enjoys exploring different websites and games to help him further understand how computers and the internet work .He also enjoys using Brillkids. By having access to a laptop at home, it enhances our daily live and the future of my children. Giving my children access to a laptop and the internet at home puts them in a better advantage to achieve their goals. The computer helps our family by being able to complete homework assignments, giving them access to learning applications, and being g able to do required research. I heard about Team Children about 10 years ago and I think the things Team Children do for the children are amazing. Giving underprivileged children the proper access to achieve their goals are amazing. I will continue to tell people to come get a computer if it is needed for their family. Thank you for all your help and dedication.
