Who We Are

Manengouba Foundation, Inc is a 501(c) (3) non-profit organization committed to providing educational opportunities and facilitating cultural exchange between academic institutions in Cameroon and in the United States.

Our Goal

Our goal is to implement a variety of academic, athletic and cultural exchange programs to encourage learning and inspire young people to recognize the power of education.

Philippe & Essame

“You mean we can have internet access, computers... as people in America?”

— Essame, student, Cameroon

What We Do

We offer educational programs and activities aimed to improving technological skills of young people in Cameroon.

There is little to no exposure to computer technology for HS students in Cameroon where students, faculty and administration still rely on typewriters, paper and chalkboards.

Our aim is to narrow the technological divide between Africa and developed countries by:

- Implementing programs that will introduce the students to modern computer technology.
- Providing the appropriate training to teachers who will then transfer the knowledge to their students.

Our cultural exchange program is intended to provide an introduction to global society. The aim is to lay down a platform where talented and motivated students from the United States and Cameroon will share each other's culture and technological advances.

Physical education

Sport for All

In many African countries, the importance of sports is paramount. Sport is sometimes the only means through which peace and understanding can be achieved. We will thus use Sports as a means to attract, nurture and educate young students from disadvantaged areas, the emphasis being placed on physical and mental development, teamwork, sportsmanship and perseverance.

Lessons in progress...

How can you help?
